PLATERET RICH PLASMA

PRP (Platelet Rich Plasma) T-Lab

Platelet-Rich Plasma (PRP) is a natural treatment that uses your own blood to stimulate skin regeneration and collagen production. The plasma, rich in growth factors, helps improve skin texture, reduce fine lines, and promote healing. It's often called the "vampire facial" because it rejuvenates the skin from within—safely and naturally, without synthetic substances.

COLLAGEN INDUCTION

Microneedling Skin Rejuvenation

Microneedling is a minimally invasive skin treatment that uses ultra-fine sterile needles to create controlled micro-channels in the skin, stimulating the body's natural healing response and boosting collagen and elastin production.

This treatment improves skin texture, reduces acne scars and fine lines, refines pores, and enhances overall skin quality. It also increases the absorption and effectiveness of active serums or skin boosters.

Benefits:

- Improves acne scars & uneven texture
- Refines pores
- Reduces fine lines & wrinkles
- Boosts collagen & skin renewal
- Enhances skin glow and firmnes

Endymed Pro (3DEEP Radiofrequency)

EndyMed PRO RF Microneedling refers to the RF microneedling capability of the EndyMed PRO aesthetic platform, a professional, all-in-one radiofrequency (RF) device used in medical and cosmetic clinics for advanced skin rejuvenation treatments.

EndyMed PRO is a modular RF treatment system that supports multiple handpieces, including an RF microneedling applicator (often called Intensif), enabling safe, customizable procedures on the face, neck, chest, and body.

- It uses 3DEEP RF technology, powered by multiple RF generators, to deliver controlled energy deep into the dermis while minimizing heat at the surface, improving comfort and safety across skin types.
- The microneedling handpiece delivers radiofrequency energy through fine needles that penetrate the skin, stimulating collagen and elastin production for a range of skin concerns.

EndyMed FSR (Fractional Skin Resurfacing)

EndyMed FSR is an advanced skin rejuvenation treatment designed to improve skin texture, tone, and overall quality on both the face and body. It effectively targets fine lines and wrinkles, uneven texture, enlarged pores, hyperpigmentation, sun damage, acne scars, and mild skin laxity.

Using fractional radiofrequency technology instead of laser energy, EndyMed FSR delivers controlled heat to stimulate collagen remodeling while maintaining a high level of safety for various skin types.

The treatment is minimally invasive, comfortable, and involves minimal downtime. Over the weeks following treatment, skin gradually becomes smoother, firmer, brighter, and more refined as collagen production is naturally renewed.

PEELING

Peeling

Peeling is a skin treatment that gently exfoliates the outer layer of dead skin cells using medical-grade solutions. It helps improve skin tone, texture, and clarity—reducing acne, pigmentation, and dullness. The result is smoother, brighter, and healthier-looking skin with a natural glow.

BODY
TREATMENT

BODY TREATMENT

EMSculpt

EMsculpt is a non-invasive body-contouring treatment designed to strengthen and tone muscles while reducing fat in targeted areas. Using high-intensity focused electromagnetic (HIFEM) technology, the device stimulates powerful supramaximal muscle contractions that go far beyond what can be achieved through voluntary exercise. These intense contractions activate deep muscle fibers, encouraging muscle growth, improved definition, and increased strength.

At the same time, the heightened metabolic activity helps break down fat cells, resulting in a more sculpted and defined appearance. Each session lasts approximately 30 minutes, requires no needles or surgery, and involves zero downtime, allowing you to return to your daily activities immediately after treatment.

BODY TREATMENT

BTL Exilis Ultra 360

BTL Exilis Ultra 360 is a non-surgical aesthetic treatment designed to tighten skin, reduce fat, and improve both facial and body contours. The treatment combines two proven technologies, radiofrequency (RF) and ultrasound energy to deliver controlled thermal energy deep into the skin and underlying tissues. This dual-energy approach stimulates collagen and elastin production to improve skin firmness and elasticity, while also targeting fat cells to help reduce localized fat deposits.

The result is smoother, tighter, and more contoured skin without needles, surgery, or downtime. Exilis Ultra 360 is suitable for both face and body treatments, with comfortable sessions and a gradual, natural-looking improvement over time.

BODY TREATMENT

Crystal Fat Freezing

Crystal Fat Freezing is a non-invasive body-contouring treatment designed to target stubborn fat deposits that are resistant to diet and exercise. Common treatment areas include the flanks (love handles), lower abdomen, inner and outer thighs, back and bra bulges, arms, under-chin area, knees, and other small localized fat pockets depending on applicator size. Multiple applicators can be used in a single session, allowing one or several areas to be treated at the same time for greater efficiency.

The treatment requires no needles or surgery and involves minimal discomfort, with sessions typically lasting 30–60 minutes per area. There is no downtime, and normal activities can be resumed immediately. Fat reduction gradually becomes visible within 4–8 weeks, with full results developing over the following months as the body naturally eliminates fat cells.

Endymed Pro (3DEEP Radiofrequency)

Endymed is a revolutionary new radio frequency treatment designed to penetrate deep into the skin to naturally stimulate collagen and elastin production for a significantly smoother and tighter appearance. It's a non-surgical procedure, it is quickly growing in popularity because it's often a more appropriate treatment option than Botox or Dermal Fillers.

EndyMed Pro is an advanced, non-surgical radiofrequency treatment that tightens skin, stimulates collagen production, improves texture, and reduces localized fat, safely and comfortably for all skin types.

Using patented 3DEEP RF technology, controlled heat is delivered deep into the skin layers to trigger natural collagen remodeling without damaging the skin surface.
